- Lower monthly cost rates
- VPN extension routing

Introducing the SPA9000 IP telephony system, along with SPA400 for voicemail, and legacy phone systems. Consider this your next solution into the future of lower phone costs, with the large corporation feel.

## An Affordable Small Business Phone System with Big Business Features

- Image-X provides superior support and customization.
- Integrates with your VPN router to allow transfers to remote offices across the world..
- Customizable to fit your small business needs as it grows into future of cost effective phone systems.
- Also incorporates a surveillance system that can be wired or wireless
- Use's a fully functional auto attendant system that can be customized to your business needs.
- .Comes with 4 standard IP phone lines, and upgradeable to 16.

The SPA9000 marries the rich feature set of high-end PBX telephone systems with the convenience and cost advantages of Voice over IP. It has common voice system features such as an auto-attendant, shared line appearances, three way call conferencing, intercom, music on hold, call-forwarding and much more. The SPA9000 opens up access to the benefits of VoIP, including low cost long distance service, telephone number portability, and one network for both voice and data. The SPA9000 is so easy to configure that a fully working system can be set up in minutes. New telephones are automatically detected and registered when they are connected to the SPA9000.

The SPA9000 has an integrated web server that allow features to be configured using a web browser. The web server has multiple levels of password protected access to user and service level features.

Service level settings may be locked by the Internet Telephone Service Provider to ensure they are not inadvertently corrupted. The Internet Telephone Service Provider also can remotely update the software and settings through a secure encrypted connection. With its integrated router, the SPA9000 can be either connected directly to the internet connection or to another router on your network. The SPA9000 has separate WAN and LAN Ethernet ports. The WAN connection can be connect through DHCP or a fixed IP address. The LAN port can assign IP addresses to IP telephones and computers using NAT and DHCP.

While the SPA9000 will work with any SIP compatible IP telephone, it is the ideal host for Linksys business telephones, such as the SPA901, SPA921, SPA922, SPA941, and SPA942. Powerful configuration capabilities enable the SPA9000 to support a greater set of advanced features with these telephones, such as shared line appearances, hunt groups, call transfer, call parking lot, and group paging. With its two FXS ports, the SPA9000 can support traditional analog devices such as telephones, answering machines, FAX machines, and media adapters.
